Agenda

- Development environment
- Building your first widget
- Debugging
- Questions

Solution code and slides: <https://esriurl.com/fw-ds-25>

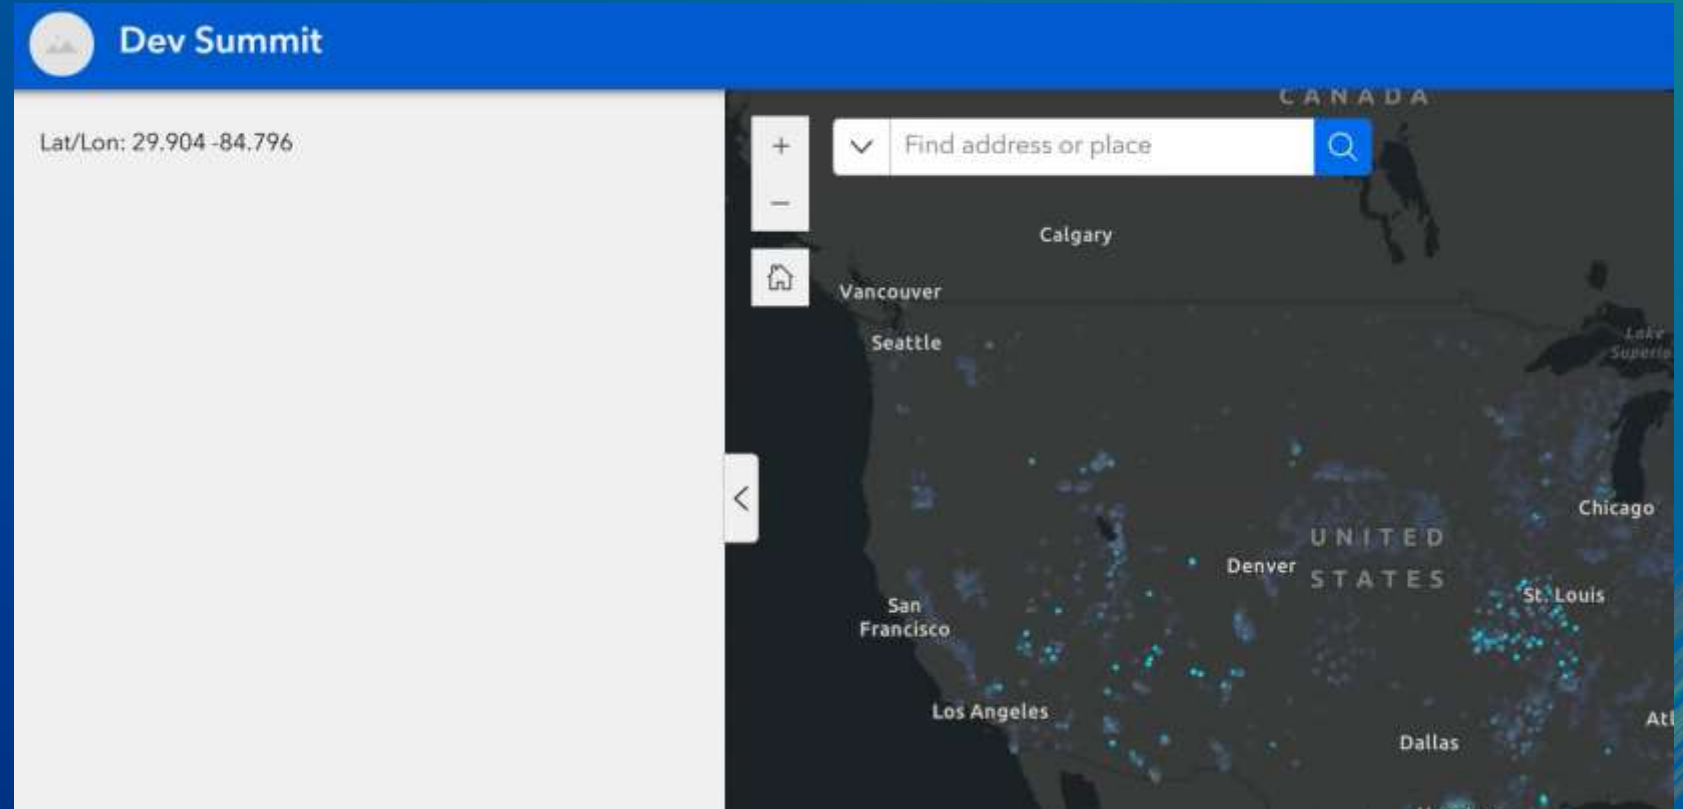

Assumptions

- Experience Builder knowledge
- Familiar with basic web development
- Medium pace - ☒ Code along
- Getting started - ☒ Production-ready code

Solution code and slides: <https://esriurl.com/fw-ds-25>

The Goal

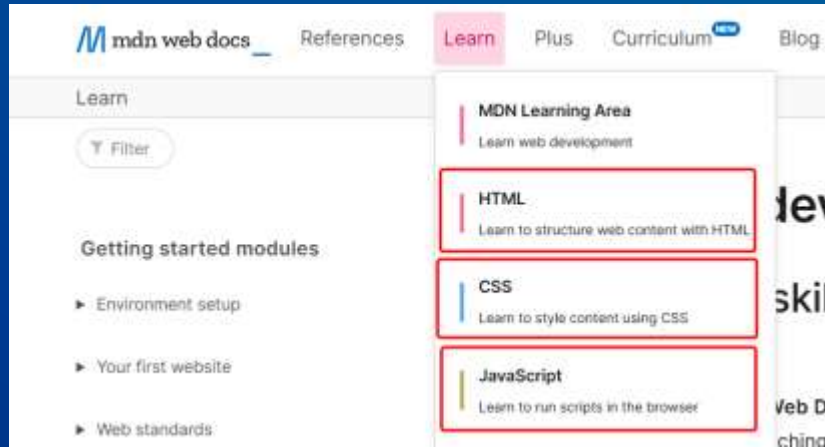

“Get Map Coordinates”
widget:

Solution code and slides: <https://esriurl.com/fw-ds-25>

Technologies

HTML, CSS, JavaScript

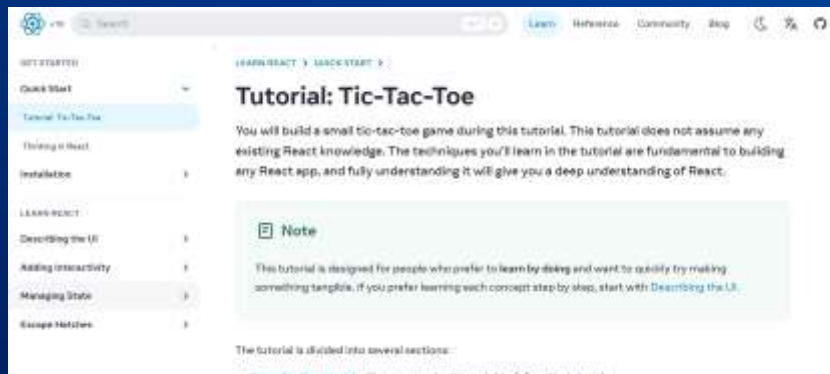

developer.mozilla.org

TypeScript

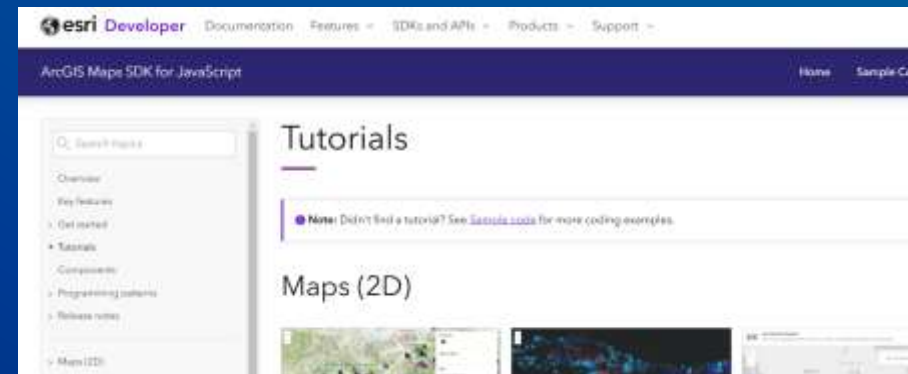

typescriptlang.org/docs

React/JSX

react.dev/learn

ArcGIS Maps SDK for JavaScript

esriurl.com/js-tutorials

Development Environment

Steps to setup your development environment

1. Install Prerequisites (NodeJS)

Download from: nodejs.org

2. Download Experience Builder Developer Edition

1. [Developers.arcgis.com](https://developers.arcgis.com)

3. Unzip the files

Steps to setup your development environment (cont'd)

4. Command line in /server directory:

- npm ci
- npm start

5. Command line in /client directory:

- npm ci
- npm start

6. Create example Experience app

Text Editor: Visual Studio Code

- Download: code.visualstudio.com 
- Open the /client folder as a project (drag-drop)

```
View Go ... < > client
... widget.tsx X
your-extensions > widgets > simple > src > runtime > widget.tsx > ...
1 import { React, type AllWidgetProps } from 'jimu-core'
2 import { type IMConfig } from '../config'
3
4 const Widget = (props: AllWidgetProps<IMConfig>) => {
5   return (
6     <div className="widget-demo jimu-widget m-2">
7       <p>Simple Widget</p>
8       <p>exampleConfigProperty: {props.config.exampleC
9     </div>
10  )
11 }
12
```

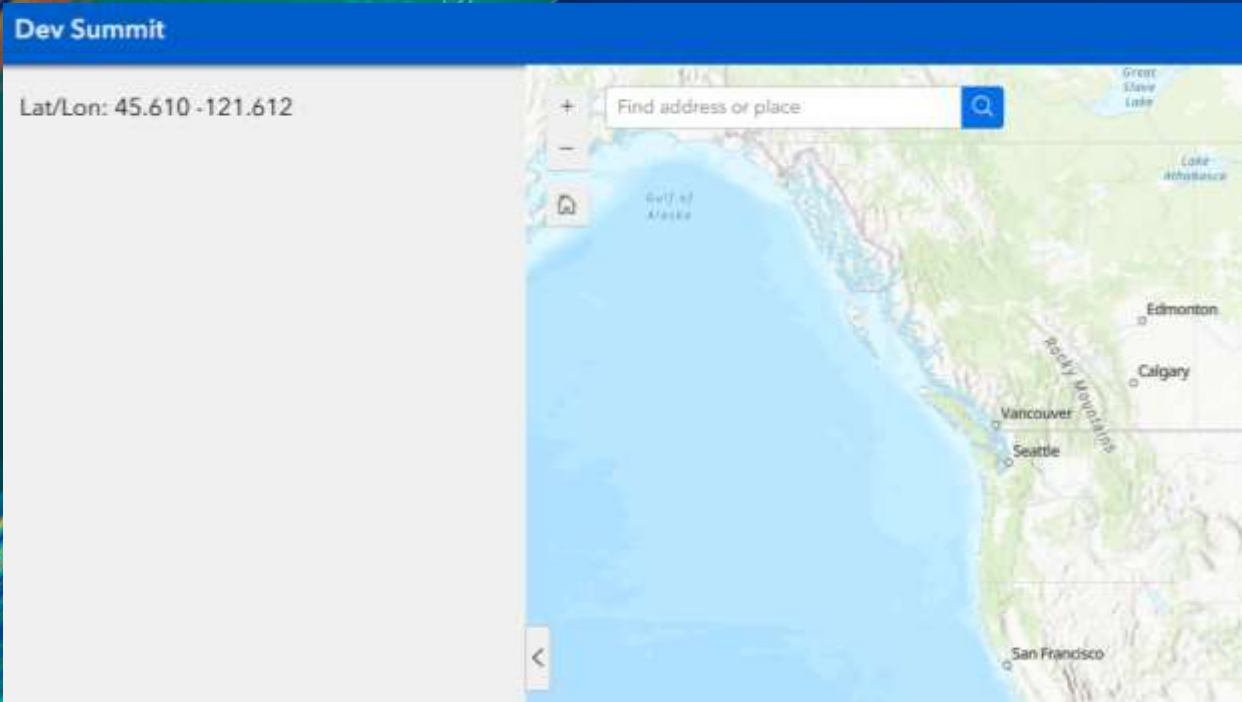

Demo: development environment setup

Building your first widget

Custom widget - steps

1. Install and setup Developer Edition of Experience Builder
2. Go to \client\your-extensions\widgets and copy the sample widget
3. Rename the sample widget
 - ***The directory name and manifest.json name must match exactly!***

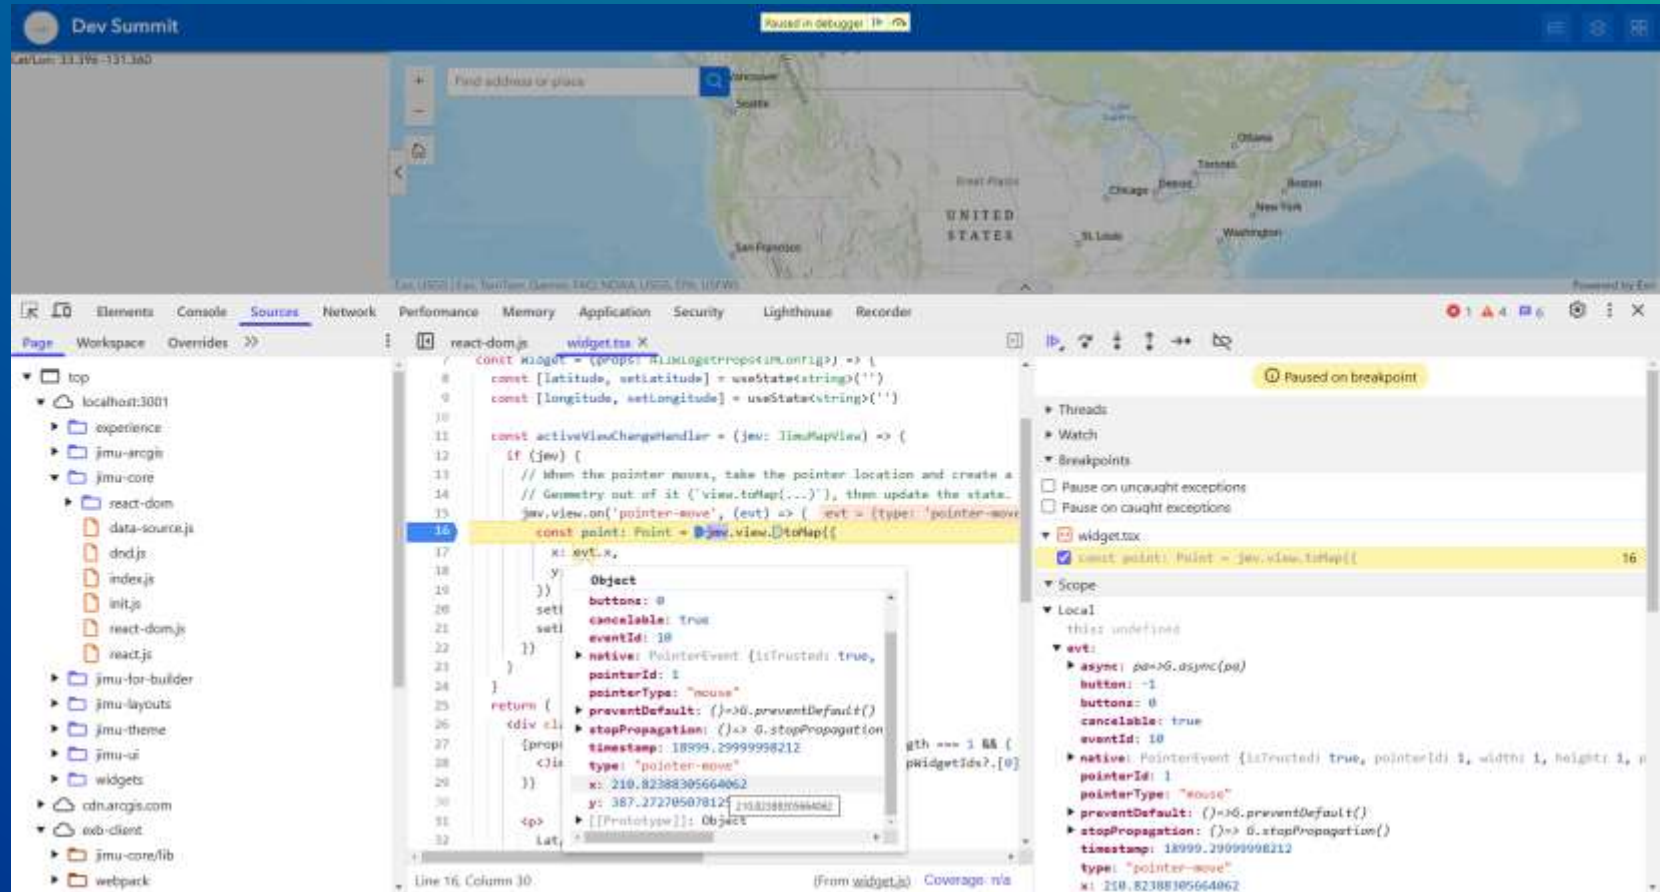

Demo: Your first widget

Debugging

Debugging tools

- Browser developer tools
 - JavaScript source and breakpoints
 - Global variables
 - Network tab
- React Developer Tools (browser extension)

More info:

<https://developers.arcgis.com/experience-builder/guide/debugging-widget-development/>

Common issues

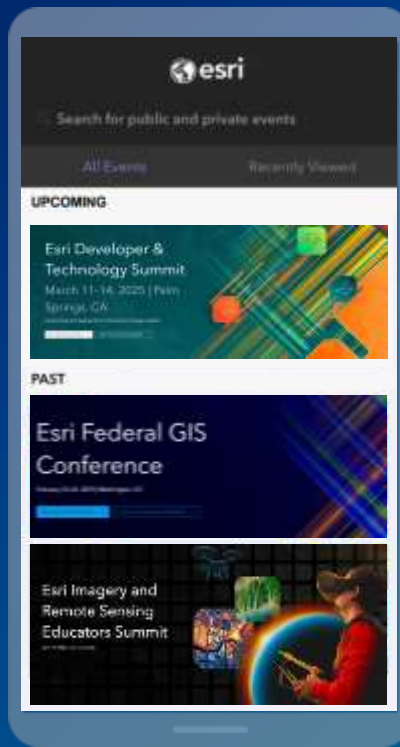

- Re-start “npm start” script on file create
- Open “client” folder as a project – TypeScript!
- “jimu-arcgis” dependency
- Understand React state
- Use Experience Builder “Data Sources”

Resources

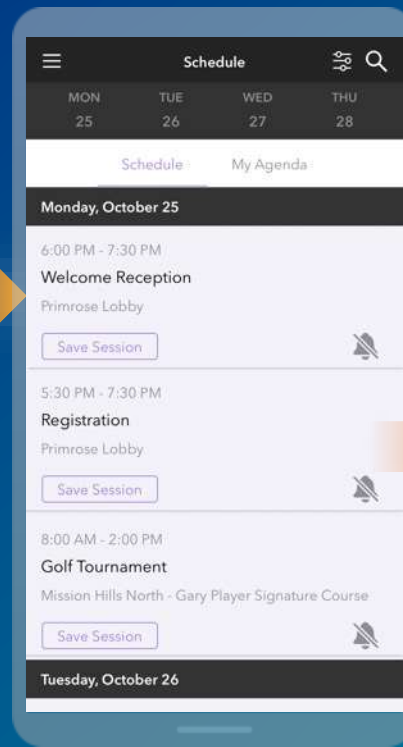

- Documentation:
<https://developers.arcgis.com/experience-builder>
- Community:
